

Full Name: Ali Asadullah Shahbaz
Short Name: Asadullah Shehbaz
Title: AI Engineer & Data Scientist
Location: Gujranwala, Pakistan
Email: asadullahcreative@gmail.com
Date of Birth: 5th March 2005
Religion: Islam
Marital Status: Single
Father's Name: Shahbaz Ahmad
Mother Language: Urdu
Nationality: Pakistani

Availability: Available for Freelance & Remote Work

Professional Summary

I am a Data Scientist and AI Engineer specializing in intelligent systems that actually ship. From agentic pipelines with LangGraph and n8n, to fine-tuned transformers and robust MLOps workflows — I deliver complete solutions.

Currently in my 8th semester at GC University Lahore (BSCS), I have completed 2 ML internships and built 11+ projects spanning agentic AI, RAG systems, computer vision, NLP, and workflow automation.

My philosophy: AI should solve real problems. Every project I build has a live demo, clean code, and a focus on measurable business impact — exactly what modern clients need.

Key Achievement: Kaggle Grandmaster in Datasets (Ranked #26 Globally) and Notebook tier — achieved in just 11 months.

Education

Degree	Institution	Year	Grade
BS Computer Science	GC University Lahore	2026 (Expected)	86% — 1st Division
F.Sc (Pre-Engineering)	BISE, Gujranwala	2022	80% — 1st Division
Matriculation	BISE, Gujranwala	2020	93% — 1st Division

Technical Skills

Programming Languages: Python, SQL, JavaScript

Machine Learning & Deep Learning: TensorFlow, PyTorch, Scikit-learn, XGBoost, LightGBM, Transformers, DistilBERT

Agentic AI: LangChain, LangGraph, OpenAI API, Groq API, Multi-Agent Systems (Router, Orchestrator, Worker, Reducer nodes)

Automation & Workflow: n8n Workflow Automation, ElevenLabs Voice AI, Ollama (Local LLM), SerpAPI, Google APIs (Sheets, Gmail, Calendar, Tasks)

Data Science & Analytics: Pandas, NumPy, Plotly, Matplotlib, Seaborn, EDA, Feature Engineering

Vector Databases & Retrieval: FAISS, ChromaDB, Tavily, RAG Systems, Semantic Memory

MLOps & DevOps: Docker, DVC (Data Version Control), MLflow, CI/CD Pipelines, Git, FastAPI, Streamlit

APIs & Backend: FastAPI, Streamlit, SQLAlchemy, PostgreSQL

Computer Skills: MS Office (Word, Excel, PowerPoint), Data Entry, Internet Browsing, Google Workspace, Basic IT Support

Experience

ML Intern — Elevo Pathways (Oct 2025 – Nov 2025)

- Developed and optimized ML models for real-world commercial use cases
- Collaborated with cross-functional teams to deploy AI solutions in production
- Improved existing ML pipelines for efficiency, maintainability, and performance

Data Science Intern — Skilled Score (Aug 2025 – Sep 2025)

- Built data-driven solutions and analytical workflows for predictive modeling
 - Performed data preprocessing, EDA, and model evaluation across multiple projects
 - Analyzed large datasets to extract trends and actionable business insights
-

Key Projects (11+ Production-Grade AI Systems)

1. AI Voice Receptionist for Dental Clinics

Type: Agentic AI · Voice Automation

Tech Stack: ElevenLabs Voice AI, n8n Automation, Groq LLM, Google Sheets

Description: A fully autonomous voice agent that handles every incoming clinic call — zero human required. ElevenLabs for natural voice, n8n for orchestration, Groq LLM for reasoning, and Google Sheets for real-time capture.

Impact: Zero missed calls, 100% automated, 24/7 availability, zero manual entry.

Flow: Incoming Call → ElevenLabs → Groq LLM → n8n → Google Sheets

Features: Answers calls automatically, collects patient details and reason for visit via voice conversation, books appointments in real-time, saves all patient records directly to Google Sheets.

2. AI Doctor WhatsApp Agent (n8n)

Tech Stack: n8n, Airtable, RAG, LLM, WhatsApp API

Description: Instant patient recognition via Airtable, smart ticketing, RAG-based patient history retrieval, 24/7 LLM-powered support — all over WhatsApp.

3. Qurbani Booking WhatsApp Agent (n8n)

Description: Automated Qurbani booking system via WhatsApp. Handles inquiries, collects booking details, confirms orders, and manages records through automated workflows.

4. AI Research Agent System

Tech Stack: LangGraph, FastAPI, Docker, CI/CD, Streamlit, Real-time search

Description: Production-ready multi-agent research system with LangGraph orchestration, FastAPI backend, Docker deployment, and real-time search capabilities.

Links: GitHub (Multi-Agent-Research-System-API) | Live Demo (ai-researcher-agent-system.streamlit.app)

5. Smart Agentic RAG

Tech Stack: LangGraph, FAISS, PostgreSQL, Docker, FastAPI

Description: Production-grade conversational AI with semantic long-term memory, FAISS vector search, and PostgreSQL-backed knowledge base for grounded answers.

Links: GitHub (Agentic-RAG-with-Knowledge-Base) | Live Demo (smart-agentic-rag.streamlit.app)

6. AI Personal Assistant Agent (n8n + Ollama)

Tech Stack: n8n, Ollama (local LLM), SerpAPI, Google APIs (Gmail, Calendar, Tasks, Sheets)

Description: Autonomous personal assistant in n8n powered by Ollama with persistent memory — manages Gmail, Calendar, Tasks, Expenses & Docs in one interface.

Features: Gmail read/send management, Google Calendar & Tasks, Expense tracking via Sheets.

7. Automated PR Code Review Agent

Tech Stack: n8n, GPT-4, GitHub API, Google Sheets

Description: Zero-intervention AI that reviews every GitHub PR the moment it opens — posting senior-dev-level feedback as a comment with auto-labeling and coding standards checks.

8. Blog Writing Multi-Agent System

Tech Stack: LangGraph, Groq API, Tavily, Multi-Agent (Router, Research, Orchestrator, Fan-out Worker, Reducer nodes)

Description: Complex LangGraph pipeline for best-in-class long-form blog generation.

9. YouTube RAG Chatbot

Tech Stack: LangChain, ChromaDB, FastAPI, Groq, Streamlit

Description: Chat with any YouTube video by pasting its URL. Ask AI to extract insights, summarize content, or answer specific questions from hours of video.

10. Kidney Disease Classifier

Tech Stack: TensorFlow, VGG16, MLflow, DVC, Docker, CI/CD, Streamlit

Description: Production-ready medical imaging classification using VGG16 transfer learning with full MLOps: DVC pipelines, MLflow tracking, Docker, and CI/CD deployment.

Links: GitHub (Kidney-Disease-Classification-Project) | Live Demo (kidney-disease-clasifier.streamlit.app)

11. Customer Churn Predictor

Tech Stack: XGBoost, LightGBM, Scikit-learn, Streamlit, EDA, Feature Engineering

Description: End-to-end ML project with deep EDA, feature engineering, XGBoost & LightGBM models, and a business-decision report for telecom retention strategy.

Links: GitHub (Customer-Churn-Prediction-for-a-Telecom-Company) | Live Demo (telecochurnpredictor.streamlit.app)

12. NLP Sentiment Analyzer

Tech Stack: PyTorch, Transformers, DistilBERT, HuggingFace, Streamlit

Description: Fine-tuned DistilBERT on IMDB reviews for sentiment analysis. Deployed on HuggingFace Hub with a Streamlit inference interface for live predictions.

13. Book Analytics Dashboard

Tech Stack: Python, Streamlit, SQL, Plotly, Pandas

Description: End-to-end data pipeline from scraping to interactive Plotly dashboard with SQL analytics and comprehensive book market insights.

Links: GitHub (End-to-End-Data-Pipeline-for-Book-Analytics) | Live Demo (books-analysis.streamlit.app)

Achievements & Certifications

- **Kaggle Dataset Grandmaster** — Ranked #26 Globally (achieved in 11 months)
- **Kaggle Notebook Master** — Dual Grandmaster tiers in under one year
- **4 Professional Certifications in AI/ML** including:
 - Machine Learning Specialization (Udemy) — 2025
 - End to End ML (Datacamp) 2025
 - Certified AI Engineer (Udemy) 2025
 - Deep Learning Specialization (Datacamp) — 2025
 - Fine Tuning (HuggingFace) 2025
 - SQL (Udemy) 2025
 - PowerBI (Udemy) 2025
 - Kaggle Dataset Grandmaster — Ranked #26 Globally (2025)

Soft Skills

Excellent communication skills · Strong managerial ability · Fast learner · Responsible & punctual · Works well independently and in teams

-

Portfolio KPIs (Key Performance Indicators)

- 11+ AI Projects
 - #26 Kaggle Global Rank
 - 11 months to achieve Grandmaster
 - 2 Internships completed
 - Zero missed calls on AI Voice Receptionist
 - 100% automated workflows
 - 24/7 AI availability
-

Services Offered (For RAG Query Matching)

- Agentic AI systems
- RAG pipelines with memory
- LLM fine-tuning and deployment
- n8n workflow automation
- MLOps (Docker, MLflow, DVC, CI/CD)
- Voice AI agents (ElevenLabs)
- WhatsApp automation bots
- Computer vision solutions
- End-to-end data science projects
- AI consulting for business problems
